Winemaking & Viticulture:

Produced from vineyards in the Hawke's Bay region on New Zealand. The soils are rocky ancient river beds with a mix of free draining stony soils and clay loams.

A remarkably warm and dry summer with cool evening temperatures resulted in an early harvest. This ensured that the grapes had beautiful

flavour and fruit intensity. The grape juice was processed with minimal pressing on skins to give a touch of colour. From here it was fermented with selected yeasts and temperature controlled to preserve the aromatic flavours.
