Winemaking & Viticulture:

Vintage 2021 has been of exceptional quality and the resulting wines will be celebrated and reflected on for many years to come. With a lower yield due to a combination of frosts and cooler weather during flowering, the grapes ripened quickly resulting in a compact and quick harvest.

The fruit for our 2021 Syrah was sourced from a tightly-centered group of vineyards in the Bridge Pa sub-region of Hawke's Bay.

The grapes were harvested into small bins to ensure we had whole berries for fermentation. The fruit was cold soaked in open top fermenters for a brief period before the fermentation process kicked off with natural yeasts from the vineyard and winery. Post fermentation the wine was pressed to oak to undergo malolactic fermentation. It was then assembled, filtered and bottled.
